Architect: Luscher Architectes

---

The building for senior citizens also posed special challenges for the doors. In addition to general ease of operation and simple use, the issue of accessibility plays an important role.

## Products

### Functional doors

Functional doors must meet the highest requirements in terms of security, smoke, fire, sound, burglary, climate and escape route protection, while also being aesthetically pleasing. At RWD Schlatter, we combine innovative technology with precise workmanship and high-quality design. Whether for homes, offices or public buildings: our doors offer tailor-made solutions for every requirement. You can rely on Swiss quality that perfectly combines functionality and aesthetics.

### Soundproof doors

Soundproof doors are functional doors that reduce the transmission of sound between different rooms or from the outside into the building and have a sound-insulating effect. Due to denser construction, increasing population density and the growing importance of working from home, the requirements for structural sound insulation are constantly increasing. In many cases, legal requirements also demand tested sound insulation. RWD Schlatter has extensive expertise in the field of sound insulation. Thanks to the company's own sound test bench, door elements can be tested and optimized.
