Customized doors

Property card

Bernaville Foundation

Category: Retirement home

Year: 2024

Type: New building

Brand: RWD Schlatter

Architect: STUDIO JES

Building promoter: Marti Gesamtleistungen AG

Site manager: Marti Gesamtleistungen AG

We were able to supply customised doors for the new building project of the Bernaville Foundation in Schwarzenburg in the canton of Bern. In addition to room doors, batten doors with glass side panels from our production were also used.

The new building complements the foundation's existing premises and creates modern, bright rooms for people with cognitive impairments. The building offers living and working areas with a high quality of stay. Transparent door solutions and glass surfaces promote openness and visual reference, while wood as the main material lends heat and naturalness.

The realisation required precise coordination of function, fire protection and design.

Fire protection and smoke protection doors

Our fire and smoke protection doors offer not only protection against fire and smoke, but also combine outstanding quality with modern design. At RWD Schlatter, we rely on innovative technologies and precision craftsmanship to create doors that provide reliable protection in an emergency whilst blending seamlessly into your interior.

Soundproof doors

Soundproof doors are functional doors that reduce the transmission of sound between different rooms or from the outside into the building and have a sound-insulating effect. Due to denser construction, increasing population density and the growing importance of working from home, the requirements for structural sound insulation are constantly increasing. In many cases, legal requirements also demand tested sound insulation. RWD Schlatter has extensive expertise in the field of sound insulation. Thanks to the company's own sound test bench, door elements can be tested and optimized.
