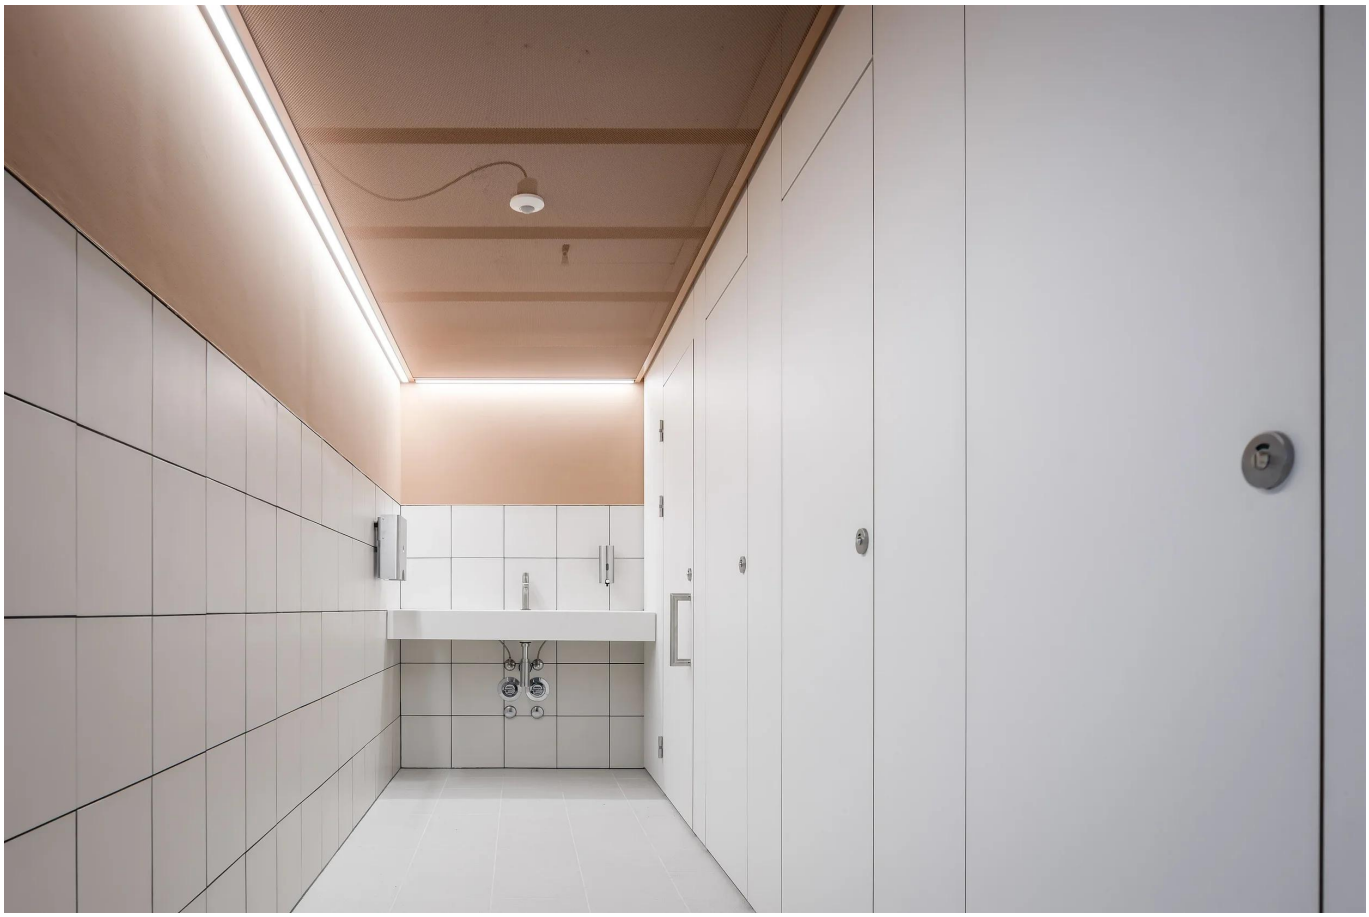
Education First



Category: Office / Administration

Year: 2025

Type: Structural alteration

Brand: RWD Schlatter

Architect: Lindner SE Arnstorf

Education First (EF) is an international provider of educational programmes specialising in language courses, exchange programmes and further education. We were commissioned to supply and install a total of 59 doors for the refurbishment of the premises on Selnauerstrasse in Zurich. High-quality interior, smoke and fire-rated, escape route and soundproof doors were used. The doors were fitted with both steel and wooden frames. The modernised building is now used as a combination of office space and an educational facility.
