Customized doors

Property card

SRF Studio

Category: Public buildings

Year: 2019

Type: New building

Brand: RWD Schlatter

Building promoter: Schweizer Radio und Fernsehen

Architect: Diener & Diener Architekten AG

The Meret Oppenheim high-rise building is located right next to the Basel train station - and also houses the offices of SRF Kultur. SoundStar doors with sound insulation ensure a pleasantly quiet ambience. The editors can work efficiently and with concentration and meet their deadlines. The walls and doors are petrol-colored and create a surprising feel-good atmosphere in the open-plan offices.

UniStar and Flamex doors with burglary and fire protection give employees and visitors a sense of security. And in an emergency, the escape route doors from RWD Schlatter allow everyone to get out safely. Access control is also well regulated thanks to doors from RWD Schlatter.

Soundproof doors

Soundproof doors are functional doors that reduce the transmission of sound between different rooms or from the outside into the building and have a sound-insulating effect. Due to denser construction, increasing population density and the growing importance of working from home, the requirements for structural sound insulation are constantly increasing. In many cases, legal requirements also demand tested sound insulation. RWD Schlatter has extensive expertise in the field of sound insulation. Thanks to the company's own sound test bench, door elements can be tested and optimized.

Veneer doors

Veneer doors combine modern door design with the natural look of real wood. A thin layer of high-quality veneer is applied to stable substrates and finished with oils, stains, glazes, etc. This gives each door a unique grain and feel - from calm and harmonious to lively and striking. This gives each door a unique grain and feel - from calm and harmonious to lively and striking. Thanks to a wide range of veneer patterns, wood types and processing variants, veneered doors offer a stylish and flexible solution for high-quality living and contract areas.
